

Simplifying Technology for the Real Estate Professional

March 17, 2004 - For Immediate Release

### LikeGlue Systems and Threewide Corporation Announce Collaboration

**Washington, MI** – LikeGlue Systems of Washington, MI and Threewide Corporation of Morgantown, WV have agreed to a working relationship which will enhance their combined offerings to the REALTOR® community. Both companies are technology driven and offer products which are RETS compliant for 'ease of interface' with existing and future Real Estate software products which also meet the RETS Standard.

The immediate goal is for Threewide's ListExporter™ product to recognize the LikeGlue Showing System Module as a 'data destination'. This important interface is scheduled to be achieved prior to the NAR Mid-Year Expo in Washington, DC. Further, the ultimate goal is for the Threewide data management products to interface with the complete LikeGlue Systems subscription-based transaction management platform.

"Our companies combine to make the real estate professional's life far easier and more productive. The single-point of data entry, compilation of closing documents and associated automation are a long overdue toolset for the hard-working real estate agents and brokers," commented Steven L. Eaton, Technical Director of LikeGlue Systems. "While our goal is to remain neutral and interface with other transaction management platforms, it only makes sense to work with LikeGlue Systems to offer such a comprehensive product set to the real estate marketplace," explained Robert Reid, Senior VP of Sales at Threewide Corporation.

The initial plan is for Threewide Corporation to offer the LikeGlue Systems FREE Showing Module to their existing customer base. This Showing System Module will be available at NO CHARGE to the Threewide customers. There will be a \$1 per month fee associated with additional functionality (automated distribution of Seller's Disclosure and Lead Based Paint Disclosure) available through the System, but the no charge version of the Showing System is fully functional, very user friendly and extremely powerful when used with the Threewide ListExporter™.

LikeGlue Systems will be located in Booth #1508 at the 2004 NAR Midyear Trade Expo.  
Threewide Corporation will be located in Booth #116 at the NAR Midyear Trade Expo.

We welcome you to stop by either booth to discuss the products and to register for the FREE SHOWING SYSTEM. In addition, Threewide Corporation will be giving away a TABLET PC to some lucky attendee. Register at the Threewide booth to be eligible to win this valuable prize.

### About LikeGlue and Threewide

LikeGlue is a product of LikeGlue Systems, a Michigan company specializing in Real Estate Transaction Management Systems for agents, brokers and associations. More information on LikeGlue can be found at [www.LikeGlue.com](http://www.LikeGlue.com). Threewide Corporation was founded in July of 1999 as Threewide Media, LLC. Early bootstrapping activities included web page development, hosting, email and internet consulting. In mid 2000, the company became Threewide.com Inc., primarily focusing on the digital capture, packaging and export of real estate data for brokerages, MLSs. Data aggregators and other industry vendors. [www.Threewide.com](http://www.Threewide.com)
